Data leader with **16 years of experience** across R&D and B2B/B2C SaaS, focused on shipping data products that move business metrics. I have built data functions from zero-to-one and scaled global departments of **40+ professionals**, with work spanning product and commercial analytics, decision science, analytics engineering and data governance — currently centred on **AI-native analytics**: semantic layers and MCP-based agentic access to governed data. Years in R&D centres and a **PhD in Data Mining and Machine Learning** at TU Wien complement a hands-on, pragmatic profile with a research attitude; I have authored more than 30 publications in major international conferences and journals.

EXPERIENCE

Senior Director, Head of Data & Insights · Moss

FEB 2026 – PRESENT

SAAS · FINTECH · SPEND MANAGEMENT · B2B

- Lead the Data function at Moss, covering **Product Analytics**, **Commercial Analytics** and **Analytics Engineering**, with end-to-end responsibility over the company's information needs
- Drive an **AI-first data transformation**: putting data at the core of decision making by enabling broad **self-serve data access** across the organisation and unlocking **data-driven RevOps automations**
- Ship **AI-native data products**: **dbt semantic layers** and **MCP servers** that expose governed, well-modelled analytics to **LLM agents**, making the warehouse queryable in natural language
- **Strategic data partnership** with the Leadership Team: ensuring strategic forums and key business decisions are backed by timely, reliable data
- Manage and grow a **team of data professionals** (analysts, analytics engineers, product analysts), shaping roles, ways of working and standards across the function

Global VP of Data · Docplanner

MAR 2024 – FEB 2026

SAAS · HEALTHTECH · B2B/B2C

- Led the Global Data function at Docplanner Group, composed of **Data Platform**, **BI** and **Product Analytics**. Directly managed a department of **~40 professionals** across multiple teams and influenced the company's data community of 250+ data experts
- Owned the **Global Data Infrastructure**, serving internal data consumers and external customers
- Drove **Data Governance** initiatives, impacting data modelling, taxonomies and the definition of KPIs across the Group's product portfolio and local/global operations
- Delivered data assets (institutional dashboards, critical pipelines, curated datasets) and **Decision Science** solutions (predictive models) for Top Management
- Spearheaded major initiatives: revamp of **software instrumentation and event tracking governance** (Amplitude, Avo, GA4); harmonisation of CRMs across local operations (Salesforce, Tableau, Superset); optimisation of **Data Warehouse architecture** and data modelling (dbt, Airflow)

Head of Data · Bird (formerly MessageBird)

JAN 2023 – FEB 2024

SAAS · CPAAS · TELCO · B2B

- Managed a cross-functional team of **Data Engineers**, **Analytics Engineers**, **Data Scientists** and **Data Analysts**
- Led data initiatives company-wide: **software instrumentation and tracking**, **data ingestion pipelines**, **data modelling and DWH architectures**, metrics definition, institutional reporting and data science
- **C-Suite reporting**: ran **Weekly Business Reviews (WBR)** for Product and Go-To-Market departments

Data Analytics Manager (Product) · Bitpanda

JAN 2022 – DEC 2022

FINTECH · CRYPTO · B2C

- **Built the data analytics function from scratch**, from hiring to definition of the Product Analyst role
- Rolled out the company's first **A/B tests**, with impact throughout the whole customer funnel
- Defined the **product metrics framework**, **customer segmentation** and characterisation of the ideal customer profile

Data Science and Analytics Manager · Typeform

JAN 2021 – DEC 2021

SAAS · MARKETING · B2B

- Managed a team of **data scientists** focused on **product analytics** and prototyping of **ML-driven features**
- Coordinated **data strategy** and objectives across multiple product and customer success squads and tribes
- Liaised with product stakeholders in setting measurable goals aligned with the company's **north star metrics**

Data Science Tech Lead · Typeform

NOV 2019 – DEC 2020

SAAS · MARKETING · B2B

- **Technical leadership** across charters of data scientists; cross-functional collaboration among data scientists, data engineers and ML specialists; definition and propagation of **quality standards**, best practices, tools and methodologies; coordination of **internal analytics tools and libraries**
- Hands-on work in **strategic, multi-disciplinary projects** aimed at informing upper management's decisions

Data Lead · Zeelo

FEB 2018 – OCT 2019

SAAS · SMART TRANSPORTATION · B2B/B2C

- **Established and led** company-wide data activities end to end (**platforms, analytics, machine learning**)
- Developed internal **ML-driven products** for **prediction of human mobility** from heterogeneous sources
- **Business Intelligence**: actionable insights for business development, operations and marketing; design of **ETL processes** and **Data Warehouse architecture**

Senior Data Scientist · Eurecat — Technology Centre of Catalonia

JAN 2016 – FEB 2018

R&D · CONSULTANCY

- **Technical leadership** in applied R&D projects in **Intelligent Transport Systems**, **Smart Cities** and IoT
- **Business Intelligence**, **Big Data platforms**, **Data Quality Assessment**, data consultancy to SMEs and startups

R&D Engineer, Data Mining · FTW — Telecom Research Center Vienna

MAR 2010 – DEC 2015

R&D · TELECOMMUNICATIONS

- Commercial R&D projects in **network data monitoring and analytics** in collaboration with major ISPs
- **Machine Learning and Data Mining** applied to massive network datasets: exploratory analysis, **human mobility characterisation**, **user profiling**, **detection and classification of network anomalies**

EDUCATION

PhD, Electrical Engineering & Information Technology · TU Wien (Vienna, AT)

2015

Dissertation: data analytics in computer networks and design of ML/AI systems for automatic anomaly detection and diagnosis. Courses: Business Intelligence, Data Mining and Machine Learning, Distributed Systems.

MSc, Computer Engineering · Sapienza University of Rome (IT)

2010

Major in Data Mining. Dissertation: extraction of mobility patterns from mobile network signalling data through Data Mining techniques.

BSc, Computer Engineering · Sapienza University of Rome (IT)

2008

Final project: design and implementation of a Java application for peer-to-peer file sharing.

TECHNOLOGIES & LANGUAGES

AI & AGENTIC DATA	**MCP** (Model Context Protocol) servers for analytics · **LLM agents** and tool use · **dbt semantic layers** · text-to-SQL and conversational BI · retrieval over governed data · AI-assisted analytics workflows
DATA STACK	**SQL** · **Python** · dbt · Airflow · data warehousing and dimensional modelling
ANALYTICS & BI	Amplitude · Avo · GA4 · Tableau · Superset · Salesforce
METHODS	Machine Learning · statistical modelling · A/B testing · data governance
LANGUAGES	Italian (mother tongue) · English (high proficiency) · Catalan (good proficiency) · Spanish (basic)

Last update: August 2026
